Valuation: _____

Type of sign _____ Duration of sign (number of days): _____

Sign height above grade (feet) _____ Area of sign (square feet) _____

Dimensions of sign _____

Are there any existing signs on the property? Yes No

If yes show location on site plan, including size, dimensions, and type.

Freestanding Sign(s) A sign supported upon the ground by a frame, pole(s), or other support structure which is not attached to any building. A freestanding sign shall count as one sign, even if it has two or more faces. In this context, freestanding signs include monument (ground-mount), pole, and pylon-type signs.

Monument - A freestanding sign of which the entire bottom of the sign is generally in contact with or in close proximity to the ground. Does not include pole or pylon signs.

Pylon Sign - A freestanding sign, usually double-faced, mounted on one or two supports above ground level. Also referred to as a pole sign.

Building Mounted Sign(s) – A sign permanently attached to a building.

Canopy Sign – A sign painted on, printed on, or attached flat against the surface of a canopy or awning.

Projecting Sign – A sign, other than a flat wall sign, which is attached to and projects from a building wall or other structure not specifically designed to support the sign.

Roof Sign – Any mounted sign that projects above the top of a wall, eave, or parapet. Signs on a mansard roof or on a wall on the end façade of a gable roof are considered wall signs for the purposes of this ordinance, provided they do not extend above the roofline.

Hanging Sign – A sign that hangs beneath a marquee, canopy, or awning and is perpendicular to the building face.

Wall Sign – A sign attached parallel to and extending not more than twelve (12) inches from the wall of a building. This definition includes painted, individual letters, and cabinet signs.

Required Plan Submittal:

The following information must be provided to complete the planning sign permit and building permit (if required) review.

Three (3) site plans with the following information: (*drawn to scale, with a north arrow, legible, and of a reproducible size*), including the following information (see sample site plan):

- Curb and right of way locations, including street names
- Location of all property lines
- Location, type, size, and height of all existing and proposed signs
- Setbacks: Sign(s) to property line(s), Sign(s) to building(s)
- Location of all existing buildings
- Clear vision triangle for driveways (10') and intersections (15' commercial and industrial and 30' residential)
- Indicate parking and landscaping areas

Two (2) complete sets of construction plans with the following information:

Sign elevations drawings: Indicate scale, lighting design, height, and dimensions per sign (may be included with construction drawings). This should be indicated on each type of drawing.

Construction Plans (include plan view of sign, sign dimensions, plan view of foundation, sign elevations, method of attachment, bracket detail, if attached to building. **Please note** engineered plans are required for signs six (6) feet in height or taller. Engineered plans may also be required if increasing the size of a cabinet on an existing sign.

Electrical permits from Yamhill County Building (503) 434-7516, must be obtained for signs that are directly or indirectly illuminated or that are backlit.
